

# OWL LABS

WORK FROM ANYWHERE

Better Collaboration for All

# MEET THE MEETING OWL

Powered by Wise OS™, the Meeting Owl Pro is a 360° intelligent conference camera that automatically shifts to focus on whoever is speaking. The result is an experience that feels like sitting in the meeting or classroom.

## See the Meeting Owl in Action

# KEY DIFFERENTIATORS

## **COST-DISRUPTIVE**

The Meeting Owl Pro is an all-in-one camera, speaker, and microphone available at a cost-disruptive \$999, making it easy to deploy the Meeting Owl on university campuses, in K-12 classrooms, or across globally distributed offices.

## **INTELLIGENT AUTOFOCUS**

The Wise OS™ uses artificial intelligence (AI) and computer vision to hear and see who's speaking in the meeting room and uses smart zooming for remote participants, making it easier for them to follow and participate in conversations.

## **SOCIAL-DISTANCING FRIENDLY**

The Meeting Owl sits at the center of the table with an audio reach of up to 18 feet so in-room meeting participants can safely socially distance in the workplace.

## **360° FIELD OF VIEW**

The Meeting Owl Pro's panoramic lens provides a 360° field of view of the conference room. For comparison, fisheye lens and PTZ conference cameras try to fit everyone in the room into one view, thus distorting the image for remote participants.

# TECH SPECS

- **Video Quality:** 360° camera in 1080p
- **Microphone:** 18-foot radius audio pickup, great for medium and large rooms. Smart mics also equalize speaking volume.
- **Speaker:** 360° tri-speaker
- **Intelligence:** Wise OS™ with autofocus and Smart Zooming functionality
- **Processing Power:** Qualcomm® Snapdragon™ 605 processor

# USE CASES

The Meeting Owl Pro has been found to help:

- Connect employees who are working from home, working remotely, or are traveling to in-person meetings
- Connect satellite offices and HQ for global meetings
- Enable hybrid and distance learning in classrooms
- Perform patient rounds in hospitals and medical facilities
- Enable remote courtroom proceedings

## What do meetings and classes look like for remote participants?

Powered by the Wise OS™, the Meeting Owl Pro automatically shifts the camera to focus on whoever is speaking. The result is an experience that feels like sitting in the classroom.

## What does the whiteboard look like for remote participants?

In this photo, the Meeting Owl Pro is positioned roughly 5 feet from the whiteboard

The whiteboard is 94" x 40"

# SETUP OPTIONS

# CONFERENCE ROOM SETUP

Place on a large conference table to enable an immersive meeting experience for all participants.

# HUDDLE ROOM SETUP

Place in the center of the table to simulate face-to-face conversations with remote attendees.

# CLASSROOM SETUP

Mount on a tripod to enable an equalized classroom experience where all participants can be seen and heard.

### CUSTOMER TESTIMONIAL

The Meeting Owls at Lola.com give the executive management team meetings a 360 degree view of our team on all sides of the table no matter where you are sitting, Bora Bora, Barcelona or Boston. Being able to see your conversation makes a difference in moving our company forward at record pace."

ARC'TERYX

### CUSTOMER TESTIMONIAL

By mounting our Meeting Owl Pro devices on tripods and using Owl Connect to pair them, we are able to create highly-accessible and collaborative spaces wherever they are needed... Our technical team appreciates the minimal amount of support required for users to get the Meeting Owls running on their own."

# What our customers customers are saying about the Meeting Owl

“ The Meeting Owl helps us see and hear each other better so we can communicate more effectively and make better decisions for our projects. It also helps us reduce travel time and expenses to and from work sites for our clients, while still being able to give them frequent project updates via video conference.”

**CHRIS COLE, COLE MANAGEMENT & ENGINEERING,  
DEVELOPMENT**

“ We know talented people may be anywhere in the world for various reasons, and we want to work with the most talented people who are capable of addressing the challenges we're trying to solve... The Meeting Owl is also a big part of our business. It's in every single conference room to make sure the distance feels as little as possible.”

**ZACK CLEARY, RO**
